

PUBLIC TRANSPARENCY REPORT

2023

IG Wealth Management

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

At IG Wealth Management, our overarching goal is to provide investment solutions focused on maximizing long-term risk-adjusted investment performance, so our clients' can confidently:

- Protect and enhance their financial well-being,
- Achieve their financial goals, and
- Generate positive outcomes for their investment portfolio and the world around us.

Since 1926, IG Wealth Management has been developing innovative ways to responsibly invest our clients' capital to maximize their investment returns.

Today, responsibly investing to achieve our clients' long-term financial goals includes integrating sustainable investing principles. We believe our investment approach provides flexibility and does not limit investment opportunities to specific strategies, companies, or suites of products. Instead, it delivers investments that incorporate sustainable investing at their core. We recognize that some clients will have certain values that will not be addressed by our broad and holistic sustainable investing approach, therefore we offer the IG Climate Action Portfolios and complimentary thematic and impact products.

Our commitment to sustainable investing includes being a member of Canada's Responsible Investment Association (RIA) and Ceres Investor Network. We are also a signatory to the United Nations-supported Principles for Responsible Investment (PRI), the Task Force on Climate-Related Financial Disclosures (TCFD), and Climate Action 100+.

We exclusively partner with Sub-Advisors who are also signatories to the PRI and share our commitment to sustainable investing through:

- ESG integration
- Active ownership (namely engagement and proxy voting), and
- Collaboration efforts.

To ensure the advancement of our sustainable investing commitments, we require and continuously monitor our Sub-Advisors' adherence to the above requirements. This holistic investment approach helps identify risks and opportunities that could have a material effect on clients' investment portfolios. We believe this approach reduces investment risks while enhancing long-term investment outcomes for our clients, while concurrently aiming to influence and improve environmental, social and governance (ESG) outcomes for the world around us.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

As the sustainable investing landscape continues to evolve, IG Wealth Management regularly evaluates, refines, and enhances our overall sustainable investing approach. In 2021 and 2022, our progress and achievements were captured across two categories. 1) Climate Action and Commitments 2) Sub-Advisor Selection, Oversight, and Reporting.

Climate Action and Commitments:

In May 2021, IG Wealth Management joined Climate Action 100+, an investor-led initiative to ensure the world's largest corporate emitters take action on climate change.

In October 2021, IG Wealth Management and 35 institutional investors managing \$5.5 trillion in assets signed a new Canadian Investor Statement on Climate Change. Coordinated by the Responsible Investment Association (RIA), the Statement, calls on companies to act on material climate risks, and makes clear the actions major Canadian investors will take to support the global pursuit of net-zero emissions by 2050.

The same day, IG Wealth Management launched the IG Climate Action Portfolios, a suite of four managed solutions which aim to provide clients with the opportunity to support and benefit from the global transition to net zero emissions. We provided educational content for advisors and clients that explained the concept of climate change, causes, and the global effort underway to combat it, including details on COP 26, economic impacts and opportunities, and our use of carbon offsets in these products. The sales of the IG Climate Action Portfolios continue to see positive flows, increasing from \$70m as at the end of December 2021, to over \$100m as at the end of Dec. 31st, 2022.

Subsequently in November 2021, IG Wealth Management contributed towards the development of the IGM Financial Climate Position Statement which was made available publicly on igmfinancial.com.

In 2022, IG University partnered with the Responsible Investment Association (RIA) to offer the Responsible Investment (RI) Fundamentals for Retail Advisors course. The course provides knowledge of RI practices and serves as a foundation for informed discussions with clients about IG's Climate Action Portfolios and ESG perspectives.

In February 2022, we became a member of Ceres Investor Network on Climate Risk and Sustainability, a non-profit working to advance sustainable investment practices. Additionally, IG Wealth Management is also a participant in the monthly Ceres Paris Aligned Working Group.

In September 2022, IG Wealth Management participated in a Zero Emissions Day event hosted by the IGM Green Business Resource Group. The event, which featured business leaders from across the company and the climate actions they are taking was attended by over 1,000 participants from employees and advisors across IGM Financial.

Sub-Advisor Selection, Oversight, and Reporting

IG Wealth Management continues to strengthen our processes for selecting and ongoing monitoring of our Sub-Advisors to ensure they have capable sustainable investing practices and resources.

In 2021, we heightened Sub-Advisor expectations, specifically requesting mandate level ESG reporting, company specific ESG integration and stewardship examples, firm level policies and guidelines. These enhanced expectations and oversights provide us with additional insights and access to company level ESG metrics to better understand the ESG risks, opportunities, and exposures of investee companies in our investment products. Subsequently, we developed a sustainable investing information repository and tracking of information and responses, and a summary assessment for each Sub-Advisor/investment mandate completed during our annual due diligence with Sub-Advisors.

In January 2022, IG Wealth Management sent a letter to all our Sub-Advisors encouraging them to consider joining GFANZ, TCFD, and CA100+. Throughout 2022, IG Investments – Investment Advisory held a minimum of two climate related meetings with each Sub-Advisor better understand their climate-specific firm level strategic priorities and related resources/tools to support climate priorities.

Furthermore, in December 2022, to enhance our ongoing oversight and monitoring due diligence process, IG Wealth Management subscribed to MSCI ESG Manager. The MSCI ESG Manager Tool allows us to aggregate climate specific metrics and publicly disclose those in the annual IGM Financial Sustainability Report, which contains TCFD Reporting. This is in addition to our Morningstar Direct subscription, which allows us to complete ESG and sustainability related analysis and reporting.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

As outlined above, IG Wealth Management made notable enhancements to our sustainable investing strategy in 2021 and 2022. We continue to evaluate the sustainable investing landscape for opportunities to refine and further enhance our efforts. This will be achieved by collaborating with our Sub-Advisors and working with IGM Financial who is currently refreshing their Corporate Sustainability strategy. This strategy refresh is expected to be completed by 2024. Further details will be publicly disclosed in future annual PRI questionnaire responses, CDP Reporting, and IGM Sustainability Report.

Externally managed
(T) Private equity

We do not currently hire sub-advisors for private equity investments to manage separately managed accounts for these assets. However, all of our private equity asset managers are PRI signatories and they do have capable sustainable investment resources. This is an important consideration when we select the asset managers for private equity investments. Given this is a relatively new area of investment for our firm we are evaluating our processes for consistency with our directly sub-advised mandates.

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

(A) Yes, we have a process to identify and assess climate-related risks

(1) Describe your process

Our sub-advisors are responsible for determining when and how climate transition and physical risks are material, and for incorporating these risks into their investment process. Our sub-advisors have resources and tools to assess climate-related risks and opportunities, which provides them the ability to assess climate considerations such as greenhouse gas emissions data and portfolio temperature alignment. This provides them the ability to better inform their investment decisions and engagement activities with the investee companies.
